### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1793

Applicant's election without traverse of Group I, claims 1-8 and 20-24 in the reply filed on 9/19/07 is acknowledged.

The following is the restriction previously made on 9/6/07:

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I, claim(s) 1-8 and 20-24, drawn to a cement +cationic or secondary or tertiary amino-modified cellulose ether (elected now w/o traverse).**

Group II, claim(s) 10-13,15,16,25, and 26, drawn to a cellulose ether.

Group III, claim(s) 17-18, drawn to a method controlling curing time of cement+modified cellulose ether.

The inventions listed as Groups I do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claim 1 is either anticipated or obvious over Shimomura et al. (JP 05213646 abstract) or EP 859011 (De Baynast et al.-applicant supplied reference). Both references teach a composition comprising *cement* and *cationic cellulose ether* thus anticipating applicants' claim 1 (see abstract for each reference). As the recited claimed composition of claim 1 does not make a contribution over the prior art, unity of invention is lacking and restriction is appropriate.

35 USC 102/103:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1793

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 and 20-24 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Shimomura et al. (JP 05213646 abstract) or EP 859011 (De Baynast et al.-applicant supplied reference).

Both references teach a composition comprising *cement* and *cationic cellulose ether* thus anticipating applicants' claim 1 (see abstract for each reference). As the recited claimed composition of claim 1 does not make a contribution over the prior art, unity of invention is lacking and restriction is appropriate.
